Dear Rich / Adam,

I would like to take this opportunity to thank Edwards Electric for their expertise and devotion to the electrical construction field. Being in the construction field for the last 37 years, I have seen many contractors come and go. I had the pleasure of first working with your company 13 years ago at an addition and complete remodel of an open 24 hour grocery store. First impression was great and only continued to get better. Every day on this project was an adventure, your company addressed ALL issues and challenges in a positive and timely fashion. There was NO problem big or small that could not be remedied by your company.

In the past 13 years, I had the pleasure of working with Edwards Electric on many different projects (Restaurants, New and renovated hotels, Senior Housing, Grocery Stores, and New/ Renovated Retail). Every project was coordinated and executed in a timely and very professional manner. From the initial electrical service to the final outlet screw, Edwards Electric brings to the table a complete package (Knowledge, Work Ethics, Capable Manpower, Coordination, Timeliness, Value Engineering and Troubleshooting). In my mind, Edwards Electric would be the electrician of choice.

Thank you Rich, Adam and the rest of your team for setting your standards high and then continually maintaining such high standards.

Yours truly,

Kevin W. Inch
